Complete confidence in your irrigation system gives you peace of mind. Rain Bird's industry leadership and sole passion is irrigation. Complete confidence in Rain Bird quality, reliability and ease of use is demonstrated daily on golf courses around the world.

In 1933 the Rain Bird spring activated impact sprinkler revolutionized irrigation throughout the world. Rain Bird was the first to install an irrigation system on a golf course and the first to develop central control.

More than 80 years after our first sprinkler, our PC-based control systems continue to offer the type of innovations that have made Rain Bird the first choice in golf course irrigation.

Since 1998, **more than 1500 Golf Courses in 40 different countries** in Europe have installed and benefit from the reliability of a Rain Bird Stratus™, Nimbus™ or Cirrus™ computer based Central Control system.

In addition many smaller Golf Courses in Europe benefit from the reliability of Rain Bird non-computer based ESP-LXD, MasterII or MDC decoder Central Control Systems

More than 700.000 Rain Bird decoders are in operation today and work reliably year after year without requiring any maintenance or replacement.

Rain Bird's integrated approach to golf course irrigation means the solutions you choose today won't be obsolete next year.

Another first from Rain Bird connects now central control directly to the rotor and valve.

Rain Bird IC™ System

Rain Bird's innovative Integrated Control Technology™ uses up to 90% less wire and up to 50% fewer splices. It eliminates satellite controllers and decoders. It minimizes irrigation waste. And it creates peace of mind by minimizing installation and maintenance hassles.

Our Cirrus™, Nimbus™II and Stratus™II Control systems use the same decoders, IC modules or satellites. All systems can be upgraded as your needs change without changing satellites, decoders, IC modules or field wiring. Any system can be easily expanded. Rain Bird is committed to cross-systems compatibility and reliable upgrade capacity. Do not invest in a system that is destined for obsolescence.

Complete confidence in the Rain Bird promise to stand behind our product through outstanding service is our commitment to you. Our proven performance and ongoing innovation give you the peace of mind that you need, today and in the future.

The Intelligent Use of Water™

LEADERSHIP ♦ EDUCATION ♦ PARTNERSHIPS ♦ PRODUCTS

At Rain Bird®, we believe it is our responsibility to develop products and technologies that use water efficiently. Our commitment also extends to education, training and services for our industry and our communities.

The need to conserve water has never been greater. We want to do even more, and with your help, we can. Visit www.rainbird.eu for more information about The Intelligent Use of Water™.
